Customer Information Form – Water Damage

1. **A NATIONWIDE SERVICE PROVIDER**. SERVPRO® is a Franchise system with over 1,600 independently owned and operated locations nationwide. Servpro Industries, Inc., the Franchisor, may be reached at 1-800-SERVPRO.

2. **WORK AUTHORIZATION.** To start our mitigation and restoration service, you must sign the *Authorization to Perform Services* form. This allows us to take action immediately. We do not know your insurance coverage; therefore, it is impossible for us to know exactly what your insurance will cover. It is important for you to understand you are financially responsible for our services. Your deductible is payable before we start work. If for any reason insurance coverage cannot be verified at the time of our emergency services, an additional deposit may be required.

   Date Damage Occurred: _____

   Insurance / Client: _____

   Policy #: _____

   Deductible Amount: _____

3. **REFERENCES.** The Franchisee would be pleased to provide references upon request.

4. **HOW WE PROCEED.** The Franchisee will attempt to "preserve and protect" your structure and contents. The following steps may be completed in the emergency service, as determined to be applicable by the Franchisee:

   - Survey the Extent of Damage and Inspect the Premises: Our initial inspection of the premises is designed to identify how much damage has occurred and plan the necessary emergency work. The inspection is also done for safety reasons. We check the affected area for bad flooring, ceiling damage, visible electrical hazards, contents damage, wall and baseboard damage, sewage water, visible mold, etc.

     Are you aware of any potential safety hazards in the structure? ○ Y ○ N

     List: _____

   - Identify Source / Type of Water: Contaminated water sources (like sewage, etc.) require specialized restoration processes. Additionally, the source of water should be completely stopped prior to starting any work other than the removal process.

     Source of water intrusion: _____

     Has the source of water been stopped? ○ Y ○ N

   - Identify Visible Mold Growth: It is important for us to know if visible mold growth is present. While molds may be found in small amounts almost anywhere, larger growths of mold may create health concerns depending on occupants' reaction to mold.

     Have you seen signs of mold growing anywhere in the structure or its contents? ○ Y ○ N

     Seen mold growth at any time in the past? ○ Y ○ N

     Noticed any odors or musty smells? ○ Y ○ N

   - Specialized procedures are required for materials like mold, lead paint, asbestos, Chinese drywall, etc. If we notice a significant presence of these types of materials, or believe there is a likelihood that such materials exist in the structure, we will notify the involved parties so they may determine an appropriate course of action.

     Are you aware of any materials in the structure which might require specialized cleaning procedures (mold, lead paint, asbestos, Chinese drywall, etc.)?

     ○ Y ○ N

   - Measure Temperature/Humidity for Drying Analysis: The process of drying will use equipment to remove moisture from the structure and contents of your home or place of business. This controlled reduction of the relative humidity level helps minimize property damage and slow mold growth.
   - Emergency Water Extraction: Our next step is to remove as much water as possible from the affected area. This will be completed with our specialized extraction equipment.
   - Furniture Moved and Blocked: This is done to protect carpet and furnishings in the affected area.
   - Floor Service: We will check to see what type of floors you have. Carpet will be lifted to inspect flooring. As much water as possible will be removed.
   - Carpet Pad: Pad acts like a sponge and holds water. If the pad is exposed to excess water, it may be necessary to remove the pad to protect the subfloor and speed the drying process.
   - Carpet: Carpet will be checked for restorability, delamination, visible mold and mildew, etc. In some water damage situations, the carpets may need to be removed. This can include door removal, cutting seams, and metal threshold removal.
   - Treatments: Our process may include the application of EPA-registered disinfectants.
   - Equipment: Drying equipment will be used to dry your property. The equipment's purpose is to remove excess moisture and bring relative humidity levels back to normal. It is important all equipment be kept running, unless a safety hazard arises. Excessive moisture can still be present even when all visible surfaces seem dry, which may lead to mold growth or other damage. We will monitor moisture in wet materials.
   - Disposal: Any refuse items such as carpet pad will be removed and disposed of properly.

5. **WHAT IS RESTORABLE.** Determining exactly what can be saved before everything is dry is usually impossible. We will set a follow-up date so we can monitor the drying process. Additionally, the restoration process will be scheduled when the drying is complete. This can include floor preparation, tack strip replacement, carpet and pad installation, seaming, carpet cleaning and restoring, and furniture and contents cleaning. A scope of services will be provided.

6. **PREEXISTING OR PRELOSS CONDITIONS.** During the course of cleaning we will likely remove day-to-day soiling that existed prior to your loss. We are happy to do so. If, however, the removal of preexisting soil requires significant extra effort, our crews will be instructed to move on to the next item. Preexisting damage, including visible mold growth, will also be noted.

   Has the structure sustained leaks or water intrusions in the past? ○ Y ○ N

7. **PERSONAL ITEMS.** In the course of our survey and cleaning, we will sometimes be required to open doors, cupboards, etc., to qualify and/or restore the damage. If you prefer to remove personal items and personal or financial information from these areas before we start, please let us know.

   - Guns and Ammunition: Our crews are instructed NEVER to touch guns or ammunition. For this reason we request you remove any such items from the areas we are cleaning.
   - Jewelry, Valuables, and Heirlooms: Please remove any valuable items from the areas we are cleaning before the job is started. We are not responsible for those items. List any special heirlooms or collectibles that should be given extra special or especially delicate treatment due to their value.

     List: _____

     Will you be removing any personal items, guns, ammunition, jewelry, valuables, or heirlooms prior to the Franchisee beginning work? ○ Y ○ N

8. **OVERLOOKED ITEMS.** Although our supervisors inspect all work, you should accompany the supervisor on the final walk-through and bring any overlooked items or concerns to the supervisor's attention.

9. **INSURANCE ADJUSTERS OR AGENTS.** We are neither insurance adjusters nor agents. We cannot authorize anything to be replaced, repaired, or painted. Our job is preserving and protecting, stopping further damage from occurring, and restoring damaged items to their prior condition when possible.

10. **EMERGENCY CHARGES.** The exact price of restoring your property following water damage is virtually impossible to determine on our first visit. A verbal briefing will be provided to you and/or your insurance adjuster. The scope of work can change due to unforeseen circumstances. The final bill will be forwarded to you and/or your insurance carrier upon completion.

11. **HEALTH AND SAFETY.** Maintaining your personal health and safety is of great concern to us. All occupants and pets should stay away from work areas to protect their health and safety during the work process. Safety Data Sheets (SDS) for our products are available upon request.

    Would you like any copies of the SDS? ○ Y ○ N

    Exposure to certain molds may cause health problems. If you have any concerns, you should consult a physician.

    If you desire additional information, please request the SERVPRO® *Understanding Mold* brochure, and contact your local or state health department.

    Has anyone in the structure experienced reactions to the water intrusion? ○ Y ○ N

    Do you have any health concerns about the water intrusion? ○ Y ○ N

12. **APPROXIMATE COMPLETION.** The actual time required to complete the restoration process is difficult to estimate. We estimate approximately _____ days.

I HAVE READ AND UNDERSTAND THE ABOVE STATEMENTS AND INFORMATION CONTAINED HEREIN. MY ANSWERS TO THE ABOVE QUESTIONS ARE ACCURATE AND COMPLETE.
